

Seung Jun Oh is the President and CEO of Space Environment Laboratory, Incorporated (SELab. Inc., hereafter SELab). SELab is a Korean IT venture company pursuing fusion technologies. Mr. Oh founded SELab with two other co-founders at the venture incubating center, Seoul National University (SNU) in 2002, with the purpose of developing space environment solutions. After he became a CEO of the company in 2008, Mr. Oh expanded the company's business domain to data science and environmental technology, including space and meteorological solution.

Mr. Oh holds a degree in Earth Environment. The most recent business line that he would like to strengthen is data analytics consulting services.
