

Ted Chang is Chief Technology Officer, Vice President, and General Manager at Quanta Computer, the world's foremost computer ODM and top laptop manufacturer. With over two decades in the tech industry, he has decisively shaped Quanta's technological trajectories and driven international research alliances. Dr. Chang is instrumental in helming the Quanta Research Institute (QRI), a front-runner in advanced research, and BU12, a distinct unit that fuses AI, IoT, and Cloud innovations to propel groundbreaking shifts in sectors like Healthcare, Medicine, and Agriculture.

Dr. Chang is esteemed for his guest professorships at elite institutions: EECS colleges of National Taiwan University, National Cheng-Kung University, Asia University, and the AI faculty of National Yang-Ming Chao-Tung University. He plays an influential role as a board member for prestigious foundations, including Epoch, Spring, and the Quanta Culture and Education Foundation.

With innovation at his core, Dr. Chang boasts over 220 global patents as of Oct. 2022. His notable collaboration with MIT's CSAIL since 2004 and pioneering projects, such as OLPC and the QRI research model, are celebrated as Harvard Business School case studies.
